**Subject:** Economic growth throug tax donations

To all Representatives concerning taxation, budget, and economic development,

Let me first start off by saying that I am sending this message to various members of the congress, and committees. I have also sent this to memebbers at the federal level. It my intention to be as bi-partisan as possible. I am also aware that this message will be first screened by a staff member, and I hope it is forwarded to the appropriate department, or person.

I would like to share an idea I had to one, help resort the budget, and two, to increase economic activity. I have entitled my idea The Non-Profit Employment Incentive: It is outlined in brief below.

The basic concept is for profit businesses large to small, to help employ people who they may lay off, or those who need a job through non-profits. The system would work just like the donation program for tax deductions and so on, only these donations would go specifically to employ people at non-profits. So if company A donates \$1 million to a non-profit to hire 20 people for a year, then they would get a tax deduction, and/or reduce liability, and so on.

The two major benefits to this program would be increased employment and economic stability, and increases tax revenue without having to raise taxes. When someone is employed that salary is spent 5 to 7 times in the economy, which also means that tax revenue would be 5 to 7 greater for that money. This should spur economic growth, and make downturns less painful in the future.

I understand that this is a very complex issue, and I would be happy to hear all comments, questions, concerns, in a non-partisan fashion. Also please share this message with all appropriate persons relating to the subject matter.

Thank you,  
Paul Ruth
